Research Summary: Working on Continual Learning and Graph Representation Learning. Foundational research on novel learning algorithms and neural architectures, investigating agents capable of processing and learning from continuous streams of data, mostly within dynamic visual environments. Developing open-source libraries for training and inference in Graph Neural Networks. Published at NeurIPS, AAAI, IJCAI, TPAMI, TNNLS. Reviewer in all the major machine learning venues (NeurIPS, ICML, ICLR, etc.) and journals (TPAMI, TNNLS, Artificial Intelligence etc.)

Work Experience ____

PAVIS, Italian Institute of Technology (IIT), Postdoctoral Research Fellow

Advisor: Alessio Del Bue

- Continual Lifelong Learning for Robotic Agents
- Molecular Graph Generation with Generative Diffusion Models and Large Language Models

SAILab, University of Siena, Postdoctoral Research Fellow

GRANT PRIN 2017 REXLEARN - Advisor: Prof. Stefano Melacci

- Unsupervised and self-supervised learning in the open-set class incremental and continual setting.
- Reliability, interpretability of machine learning models and their robustness to adversarial attacks in visual environments.
- Introduced novel neural architectures based on human-like focus of attention mechanisms, in order to hinder spurious correlations, foster continual learning schemes and improve computational capabilities for Computer Vision.

• Investigated and explored the usage of GNNs to speed-up and generalize graph visualization in the area of Graph Drawing.

isTech

Six months scholarship as a graduate intern student at IsTech, Pistoia, Italy

• Research internship for the validation of a prototype system for vehicle traffic events monitoring. Collected and preprocessed data, contributed on the engineering and design of datasets. Devised architectures, training and testing pipelines for the proposed solution. Deployment of the proposed solution in a real world environment.

Questlt

Three months scholarship as an undergraduate student at QuestIt, Siena, Italy

• Usage of XPath to extract relevant information from web pages as input to the sentiment analysis tool MySnooper.

Courses: Graph Neural Networks and Neural-Symbolic Computation

Course assistant, seminar, lecturer and organization of the laboratory session

- International M.Sc. course, 2022, MAASAI, Universite Cote d'Azur
- PhD and M.Sc. course, 2021, MAASAI, Universite Cote d'Azur and UNIFI (Florence, Italy)
- Deep Learning Summer School @ UCA, 2021, UCA, Nice, France

Education _____

Ph.D. in Information Engineering and Machine Learning - Final grade: Excellent with honours	Siena, Italy
University of Siena, SAILab (Siena Artificial Intelligence Laboratory)	2020
 Three years PhD Scholarship at the Department of Information Engineering, University of Siena, Italy <i>Thesis title</i>: Local Propagation in Neural Network Learning by Architectural Constraints; <i>Advisor</i>: Prof. Marco Maggini Foundational studies on novel learning algorithms for feedforward neural networks and Graph Neural Networks (GNNs). D source code multi-platform (Tensorflow 1.x, PyTorch) libraries for GNN training and inference. Designed, developed and maintained code repositories to support result reproducibility. Presented at multiple international venues/conferences, represented the research group at external meetings/seminars at the sevence of the sev	evelopment of open- and press interviews.
M.Sc. Computer and Automation Engineering - Final grade: 110/110 with honours	Siena, Italy
University of Siena	2017
• Thesis title : Traffic events monitoring with Recurrent Neural Networks; Advisor: Prof. Marco Maggini	
B.Sc. Computer and Information Engineering - Final grade: 108/110	Siena, Italy
University of Siena	2014
• Thesis title : Automatic extraction of relevant information from Web pages using XPath; Advisor: Prof. Marco Maggini

Students supervision _____

M.Sc. Thesis "FovEx - Foveation based Explanations for deep neural networks"	Erlangen-Nürnberg, Germany
Co-advisor of the student Mahadev Panda	2024
M.Sc. Thesis ''Aggregation Functions in Graph Neural Networks''	Siena, Italy
Co-advisor of the student Faezeh Amou Najafabadi	2022
B.Sc. Thesis "Real world experimentation of Systems for Video Object Detection"	Siena, Italy
Co-advisor of the student Giulio Campagna	2018

Speaker and organization

3rd Conference on Lifelong Learning Agents - CoLLas 2024	Pisa, Italy
Local Chair	July 2024
ACDL Workshop on Graph Neural Networks	Siena, Italy
Organizer and Speaker	July 2019
LinuxDay meets Artificial Intelligence @ SIENA	Siena, Italy
Speaker	June 2019
Artificial Intelligence, Machine Learning and Big Data	Pistoia Italy
	Tistola, italy
Speaker	June 2018

Competitions, Grants & Awards

2022	Special Mention, "Marco Cadoli" prize for Best PhD thesis on Artificial Intelligence	AlxIA
2018	Hackaton, SoBigData Soccer Data Challenge, member of the winning team and main speaker	Pisa, Italy
2018	Scholarship, Recurrent neural networks for vehicle traffic event and state monitoring,	DIISM and IsTech
2017	Scholarship, Three years Ph.D. Scholarship at Department of Information Engineering	Siena, Italy
2017	"Matteo Lanzoni" Prize , winner of the best thesis award on road safety	Florence, Italy

2018/2020
